EMINE UGUR KAYNAR

www.ugurkaynar.com - ukaynar@bu.edu

OVERVIEW

Interest: Computer System Design for Cloud Computing, Distributed Systems, Cloud Storage Systems, Performance Analysis and Tuning
Skills: Ceph, OpenStack, Alluxio, Hadoop, Spark, C++, Bash, Python

EDUCATION

Ph.D., Computer Science *May 2022*
Boston University
Dissertation Title: Cooperative Caching for Object Storage
Advisor: Prof. Orran Krieger

M.Sc., Computer Science *Aug. 2013*
State University of New York at Binghamton
Thesis title: Impact of Encryption on Live Virtual Machine Migration
Advisor: Assoc. Prof. Ping Yang

B.Sc., Information Systems Engineering *May 2011*
Bogazici University (Dual Diploma Program)
State University of New York at Binghamton

RESEARCH PROJECTS

- **Caching for Object Stores:** Lead two projects that explore the integration of distributed caching architectures into today's immutable object-based data lakes to enable data lakes to expand across the data center.
  - D3N: Datacenter-scale Data Delivery Network: a multi-layer cooperative cache for object stores, as a solution to network-constrained data centers. D3N enables data sharing across analytic clusters (e.g., Spark) in a data center, and dynamically adapts to changes in access patterns.

    ◇ *Open Source Software:* **D3N Data Cache For Ceph Object Storage**,
    Merged into Ceph by Red Hat, 2021. [Ceph Documentation]

  - D4N: Directory-Based D3N: a distributed cache framework, that is built on top of the existing SSD-based caching system D3N to support writes and to provide application-specific specializations to target wide range of applications. D4N provides a distributed directory for a global state and exploits data immutability, one of the key features of object storage to reduce the complexity of efficient caching. A group of Red Hat Ceph developers is working with us to upstream D4N into Ceph. [Github]
- Kariz: Cache Prefetching and Management: Involved a cache management project that explores how to integrate rich information from data analytics platforms to enable sophisticated cache management strategies. Kariz is a cache management and prefetching system for analytic frameworks that exploits the DAGs of inter-task dependencies used by data-parallel frameworks, historical run time information, and current cache state to drive caching and prefecting decisions.
- Elastic Secure Infrastructure (ESI): Involved ESI project which explores how to build a secure bare-metal elastic infrastructure for data centers and efficiently multiplexing bare-metal servers between different tenants. Bare-Metal Imaging (BMI) prototype that we developed for ESI project is a generic bare-metal provisioning solution for rapid deployment of bare-metal nodes on demand,

and brings attractive image management capabilities (e.g., fast snapshotting, cloning, rapid provisioning etc.) of virtualized solutions to bare-metal systems.

INDUSTRY RESEARCH EXPERIENCE

- Red Hat, Boston — May. 2017 - Jan. 2022
  Ph.D. Research Intern (Office of the CTO) | *Mentors: Matt Benjamin*
  - Hybrid Cloud Cache Implemented the initial D4N prototype for Ceph object store to support hybrid cloud use case.
  - Upstreaming D3N into Ceph: Worked with Ceph RGW team on integrating the D3N cache prototype into the open source Ceph to make it available to the broader community.

  Ph.D. Research Intern (Ceph Performance Engineering) | *Mentors: Rick Sussman, Ben England*
  - **Impact of Node Failure and Recovery:** Analyzed the performance implications associated with node failure and recovery on Ceph object store, conducted performance tuning, and provided detailed performance insights.
  - **Erasure Coding vs. Replication:** Analyzed the end-to-end performance and cost impact of *replication* and *erasure-coding* for Ceph storage. Identified the overheads and pointed out possible improvements that may improve redundancy solutions' performance.

- Mass Open Cloud (MOC) Alliance, Boston — 2015 - Present
  Systems Researcher | *Mentors: Ata Turk*
  - **MOC Big Data Platform:** Worked with big data team to implement big data services on top of elastic OpenStack deployment, and worked on applying BMI provisioning solution for rapid deployment of bare-metal big-data platforms ondemand.
  - **MOC Monitoring Platform:** Worked with monitoring team to deploy monitoring infrastructure in MOC data centers to collect metrics from virtual and physical servers.

- SUNY at Binghamton — Jul. 2012 - Aug. 2013
  Research Assistant | *Advisor: Assoc. Prof. Ping Yang*
  - **Impacts of encryption on VM migration:** Studied the impact of AES and 3DES encryption algorithms on two widely used live VM migration approaches (pre-copy and post-copy).

SELECTED TALKS

- **Hybrid cloud storage**, Open Cloud Workshop 2020, Boston MA, [Video]
- **Hybrid cloud storage**, DevConf.US 2020, Boston MA, [Video]
- **D3N: A multi-layer cache for data centers**, DevConf.US 2019, Boston MA, [Video]
- **D3N: A multi-layer cache for improving big-data applications' performance**, Mass Open Cloud Workshop 2019, Boston MA, [Video]
- **The Massachusetts Open Cloud: an Open Cloud eXchange**, Red Hat Summit 2017, Boston MA
- **Big Data as a Service at Mass Open Cloud**, Open Stack Summit 2017, Boston MA, [Video]

TEACHING AND MENTORING EXPERIENCE

Mentoring
Project mentor to multiple projects in the Cloud Computing course jointly thought in Boston University and Northeastern University.

- Accelerating Ceph Cloud Storage with D4N, team of 4 graduate students
- Ceph RGW S3-Select Caching, team of 4 graduate students
- Ceph RGW Cache Prefetching, team of 3 graduate students
- Mass Open Cloud Monitoring Platform, team of 3 graduate students

Teaching Assistant
Department of Computer Science, Boston University

- Cloud Computing — Spring 2016
- Introduction to Application Programming — Spring & Fall 2014/2015
- Introduction to Computer Science — Summer 2015

Department of Computer Science, SUNY at Binghamton

- Introduction to Computer Security — Spring 2013
- Programming Languages — Fall 2012

ACTIVITIES

Filmmaking: Member of Bogazici Cinema Club. I am interested in films and film making. I made an amateur short film called "So-Âŋcalled Right" in 2013.
Sports: 3 times bronze medalist in 100m backstroke in *Women National Open Swimming Championship of Turkey* from 2000 to 2002. Many times gold medalist in 50m/100m/200m backstroke and freestyle in *Anatolia Region Swimming Championship of Turkey* from 1997 to 2009. Captain of Samsun Gazi Swimming Club from 2005 to 2009.
